SKILLS

Programming Languages

Java C#

Swift

HTML CSS Javascript / JS Libraries

Frameworks

Multipeer Connectivity

Express.JS

Communication

I am currently working at a startup
unpaid where communication is key in
our success

I worked at call centers where good
communication was my tool to resolve
issues and sell.

Eagle Scout - age 13

PROJECTS

College GPA Calculator

I have always created software during my
free time and occasionally during study time.

I bridged the gap between school and
personal development and created a GPA

Calculator so I could improve my
programming skills while finding a way to
help me do better in school.

- Calculates GPA based on grade and credits
- took a few days to create
- was created in Xcode using Swift
- is available on the iOS app store.
- 2,000+ downloads

CARDS

This app is still in development.

Currently getting a patent for the idea
